## Tenant news

Dear Park Central Tenants,

We are pleased to announce that the building has seen a significant improvement in our sustainability efforts this past year.

Comparing 2017 to 2018:

- Site energy use was reduced by **6.3%**
- Water use was reduced by **19.9%**
- Waste Generation was reduced by **21.8%**
- Water cost was reduced by **5.7%**

In 2018, 21.18 tons of recycling were diverted from the landfill. These recycling efforts conserved the following resources:

- **34,628 kW-hrs of electricity** – enough to power 2 homes for a full year
- **289 mature trees** – enough to produce 3,580,554 sheets of newspaper

- **139,258 gallons of water** – enough to meet the fresh water needs of 1,856 people
- **77 cubic yards of landfill airspace** – enough airspace to meet the disposal needs of a community of 99 people
- **3 metric tons (MTCO2E) of GHG Emissions** – the recycling of these materials prevented these GHG emissions!

We appreciate your continued participation in our sustainability programs. We look forward to more improvement in 2019 with your help!

Should you have any questions or concerns, please do not hesitate to contact the Management Office at 303.571.5000.
